

Certificate III in Mining Exploration

National ID: RII30520 | State ID:BFH6

Are you ready to unearth a fine career?

This Certificate III in Mining Exploration will help prepare you for entry level jobs in the mining industry such as a pit or underground technician, drilling offsider or geological field assistant. You'll learn how to collect and **analyse geological samples**, record information and look after the practical tasks involved in **servicing a remote field operation**.

You'll also learn **basic vehicle maintenance**, **mining computing**, first aid and **mining methods**.

To improve your employment prospects you will be enrolled in a four wheel drive unit as part of this course so you will need to have a current (manual or automatic) Driver's Licence.

Your qualification prepares you for roles such as:
