

Advanced Diploma of Cyber Security

National ID: 22610VIC | State ID: BGT52

Malicious cyber activity is growing worldwide, driving a dramatic increase in demand for cyber security solutions. Over the next decade the Australian cyber security industry is forecast to almost triple in size. This growth translates into an additional 11,000 jobs.

Study our para professional qualification designed to deliver job-ready skills leading to specialisation as a cyber security expert. Graduates will have the knowledge and skills that will equip them to provide a comprehensive set of technical services beyond networking.

Gain these skills

- perform security risk assessments for an organisation
- implement best practice for identity management
- evaluate an organisation's compliance with relevant cyber security standards, laws and codes of practice
- evaluate and implement security protection devices and software
- manage a cyber security environment
- assess and secure cloud services
- perform digital forensic investigations on workstations and mobile devices

Your qualification prepares you for roles such as:

ICT Security Specialist
