

Certificate II in Automotive Servicing Technology (Light Vehicle Servicing Pre-apprenticeship)

National ID: AUR20516 | State ID:AB05

Gear up for a career in the automotive industry

Complete this pre-apprenticeship course and you'll have what employers will be looking for in an **apprentice** light vehicle automotive service and repair technician. It will give you the skills, knowledge and behaviours to **make you more competitive** and give you a flying start in learning a trade. Plus our **strong links to the automotive industry** may also help!

Automotive technicians work on the mechanical parts of motor vehicles, including the engine, transmission and suspension systems.

Gain these skills

- Carry out servicing operations
- Inspect and service engines, steering and suspension systems
- Repair single electrical circuits
- Use and maintain workplace tools and equipment
- Apply basic automotive troubleshooting processes

Your qualification prepares you for roles such as:

Apprentice Vehicle Service Person | Automotive Service and Repair Technician

Further Study Option(s)

Certificate III in Light Vehicle Mechanical Technology
