

Certificate IV in Conservation and Ecosystem Management

National ID: AHC40920 | State ID:BGH6

Land a lead role in conservation

Certificate IV in Conservation and Land Management will provide you with the practical skills and knowledge to **lead and coordinate conservation and land management activities**. You will learn about the various areas of the industry such as land management, natural resource management, mine site rehabilitation, forestry and national parks.

This qualification allows individuals to **develop post-trade skills** and a broad knowledge of the industry prior to undertaking higher level roles in the conservation and land management.

Gain these skills:

- conduct site inspections for ecological restoration works and plan the implementation of revegetation
- produce land management maps
- recommend plants and cultural practices
- identify pests and develop pest management plans for the natural area
- safely prepare, apply, transport and store chemicals,
- treat weeds, plant pests and disorders

Your qualification prepares you for roles such as:

- National Parks Worker
- Landcare Supervisor
- Senior Conservation Worker
- Weed Management Supervisor
- Lands, Parks and Wildlife Supervisor
- Indigenous Land Management Supervisor
- Community Coordinator (Conservation)
- Soil Conservation Specialist

Further Study Option(s)
