

Certificate II in Rail Infrastructure

National ID: TLI27121 | State ID:BHH8

Are you unsure how to get your rail career On-Track?

This course will provide you with skills to engage in the **basic operations within the rail infrastructure environment**. It involves undertaking a range of tasks involving known routines and procedures and taking some responsibility for the quality of work outcomes.

You'll **focus on track work** and learn onsite in our **METRONET Trades Training Centre** - a simulated rail yard located on the Midland Campus.

On successful completion you could pursue employment as a track worker, installer or maintainer.

Gain these skills

- Identify hazards and work safely within the rail corridor
- Identify railway layouts, features and components
- Care and use of hand tools and minor mechanical equipment in the rail environment
- Measure, mark up and cut and install rail
- Install railway sleepers and fastenings.

Your qualification prepares you for roles such as:

Track Worker | Track Installer | Track Maintainer

Further Study Option(s)
