

Certificate III in Apparel, Fashion and Textiles

National ID: MST31022 | State ID:BIY7

Our Fashion Garment Construction and Production training is your path to success!

This training reflects roles within the fashion and apparel industry, equipping students with specialised technical and construction skills in fashion garments made to measure, along with production. The course has a key focus on hand and industrial machining skills, paired with textile and production insights.

Specialist facilities

Fashion at Bentley campus has been Perth's leading fashion design institution for over 50 years. Our facilities reflect cutting-edge industry equipment, machinery and technology to master the skills and equipment used in a fashion design, production and business environment.

This includes:

- Design and Fashion Forecasting Platforms
- CLO 3D Virtual Prototyping Technology
- Gerber CAD Technology including digitisers, plotters and printers
- Product Lifecycle Management (PLM) systems and training
- Laser cutter
- Embroidery machines
- Digital Fabric Printer
- 3D Printers
- Over 80 specialised industrial sewing machines
- Textile Testing Lab
- Fashion Business Lab
- Sustainability Hub
- Resource Centre.

Our courses include guest industry lecturers, industry excursions, live work design projects, design exhibits and fashion runway shows.

Your qualification prepares you for roles such as:

Production Technician | Sample Machinist | Patternmaking Assistant | Fashion Technician

Graduates may run their own fashion business or hold job roles such as production technicians, sample machinists, patternmaking assistants and specialised fashion technicians in bridal and alteration services.

Further Study Option(s)

Diploma of Apparel Fashion and Textiles (Design and Product Development)
