

MEM30505 Certificate III in Engineering - Technical

National ID: MEM30505 | State ID:W240

Are you ready to engineer a mechanically technical career?

Join an industry that is continually growing and evolving with new technologies! Students will learn theoretical components, as well as participating in hands-on workshop projects that will develop your skills and knowledge around general engineering concepts. These projects will help you develop your understanding of how drawings are transformed into buildings and manufactured items. You will become familiar with **CAD Packages** and how to **set out engineering drawings according to Australian Standards**.

Your qualification prepares you for roles such as:

Mechanical Engineering Draftspersons and Technicians, Civil Engineering Draftspersons and Technicians,
Draftsperson, Production Scheduler Assistant Engineering Draftsperson
Further Study Option(s)

Certificate III in Engineering - Technical

Diploma of Engineering - Technical (Mechanical)

Advanced Diploma of Engineering
